AGRICULTURE

ACTIVE AGRO PLUS 80

Description:

ACTIVE AGRO PLUS 80 is a versatile agricultural adjuvant designed to enhance the effectiveness of various agrochemical applications. Comprising 80% active ingredients, it functions as a spreader, activator, and wetting agent, ensuring uniform distribution and improved absorption of pesticides, herbicides, fungicides, and foliar fertilizers.

Benefits:

- Improves the performance of pesticides, herbicides, fungicides, and foliar fertilizers by increasing their absorption and effectiveness.
- Acts as a spreader and wetting agent, ensuring even distribution of sprays on plant surfaces.
- Helps agrochemicals penetrate plant surfaces more effectively for quicker action.
- Compatible with a wide range of agricultural chemicals and suitable for all crop types.
- Enhances water absorption and soil conditioning when used before irrigation.

Key Features:

- **Enhanced Spray Coverage:** Reduces surface tension, preventing droplet beading and promoting even spray deposition on plant surfaces.
- **Improved Agrochemical Efficacy:** Boosts the performance of post-emergent herbicides, insecticides, fungicides, and defoliators.
- **Versatile Application:** Suitable for use on growing and harvested crops, and can be integrated into irrigation systems to prepare soil ahead of watering.
- **Equipment Friendly:** Non-corrosive and biodegradable, it helps keep spray equipment clean and prevents nozzle clogging.

Usage Guidelines:

- With Pesticides/Fertilizers: Mix 5 ml of ACTIVE AGRO PLUS 80 per 15 liters of solution.
- With Post-Emergent Herbicides: Mix 20 ml per 15 liters of herbicide solution.
- For Irrigation Preparation: Mix 160 ml in at least 80 liters of water per acre, applying the mixture 12 hours before irrigation.
